

Paris, ce 15 Octobre 1890.

MONSIEUR,

Le Comité organisateur du Congrès des médecins, mathématiciens et naturalistes, qui doit avoir lieu en 1891 à Cracovie, fait appel au concours des savants polonais de tous les pays. Nous avons été invités à nous occuper de la participation à ce Congrès de nos compatriotes qui habitent en France. Nous croyons utile de convoquer les mathématiciens, les physiciens, les naturalistes et les médecins polonais pour prendre une décision. Nous vous prions donc d'honorer de votre présence la réunion qui aura lieu **dimanche, 26 octobre, à 2 heures**, dans le local du Cabinet de lecture polonais (*Czytelnia polska*), 46, rue de l'Arbre-Sec.

Veuillez agréer l'expression de nos meilleurs sentiments.

J. BABIŃSKI, docteur en médecine, médecin des hôpitaux, 54, rue Bonaparte.

A. DYBOWSKI, professeur agrégé des sciences physiques au lycée Charlemagne, 16, rue Rottembourg.

J. JASIEWICZ, docteur en médecine, 93, r. Jouffroy.

L. MĘKARSKI, ingénieur, 24, rue d'Athènes.

A. STĘPIŃSKI, ingénieur, professeur de mathématiques, 15, rue Lamandé.

38071/III/18

1. The first and most important consideration in the selection of a  
method of analysis is the nature of the material to be analyzed.  
In the analysis of organic compounds, the following factors are of great  
importance: (a) the nature of the organic compound, (b) the  
sensitivity of the method, (c) the precision of the method, (d) the  
cost of the method, (e) the time required for the analysis, (f) the  
simplification of the analysis by the use of a suitable reagent, (g)  
the use of a suitable apparatus, (h) the use of a suitable solvent, (i)  
the use of a suitable reagent, (j) the use of a suitable apparatus, (k)  
the use of a suitable solvent, (l) the use of a suitable reagent, (m)  
the use of a suitable apparatus, (n) the use of a suitable solvent, (o)  
the use of a suitable reagent, (p) the use of a suitable apparatus, (q)  
the use of a suitable solvent, (r) the use of a suitable reagent, (s)  
the use of a suitable apparatus, (t) the use of a suitable solvent, (u)  
the use of a suitable reagent, (v) the use of a suitable apparatus, (w)  
the use of a suitable solvent, (x) the use of a suitable reagent, (y)  
the use of a suitable apparatus, (z) the use of a suitable solvent.

2. The second consideration is the cost of the apparatus.

3. The third consideration is the time required for the analysis.  
4. The fourth consideration is the precision of the method.  
5. The fifth consideration is the sensitivity of the method.  
6. The sixth consideration is the cost of the method.  
7. The seventh consideration is the use of a suitable reagent.  
8. The eighth consideration is the use of a suitable apparatus.  
9. The ninth consideration is the use of a suitable solvent.  
10. The tenth consideration is the use of a suitable reagent.  
11. The eleventh consideration is the use of a suitable apparatus.  
12. The twelfth consideration is the use of a suitable solvent.  
13. The thirteenth consideration is the use of a suitable reagent.  
14. The fourteenth consideration is the use of a suitable apparatus.  
15. The fifteenth consideration is the use of a suitable solvent.  
16. The sixteenth consideration is the use of a suitable reagent.  
17. The seventeenth consideration is the use of a suitable apparatus.  
18. The eighteenth consideration is the use of a suitable solvent.  
19. The nineteenth consideration is the use of a suitable reagent.  
20. The twentieth consideration is the use of a suitable apparatus.  
21. The twenty-first consideration is the use of a suitable solvent.  
22. The twenty-second consideration is the use of a suitable reagent.  
23. The twenty-third consideration is the use of a suitable apparatus.  
24. The twenty-fourth consideration is the use of a suitable solvent.  
25. The twenty-fifth consideration is the use of a suitable reagent.  
26. The twenty-sixth consideration is the use of a suitable apparatus.  
27. The twenty-seventh consideration is the use of a suitable solvent.  
28. The twenty-eighth consideration is the use of a suitable reagent.  
29. The twenty-ninth consideration is the use of a suitable apparatus.  
30. The thirtieth consideration is the use of a suitable solvent.
